### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant's election without traverse of Group I, Claims 1-13, 20-23, and 27-29 in the reply filed on 7/21/04 is acknowledged.
2. Claims 14-19, 24-26 and 30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/21/04.
3. Upon further review of the elected claims, it is noted that the elected method group requires further restriction.
4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a method of adhering a metal layer to a substrate, classified in class 156, subclass 275.5.
  - II. Claims 20-23, drawn to a method of producing a metal transfer, classified in class 427, subclass 146.
  - III. Claims 27-29, drawn to a method of coating a substrate with a metal coating paste, classified in class 427, subclass 487+.

The inventions are distinct, each from the other because of the following reasons:

5. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions or effects wherein Invention I utilizes exposure to light to cure a sandwiched adhesive layer to produce an adhered laminate while Invention II produces a packaged metal transfer sheet with an uncured adhesive layer.

Art Unit: 1773

6. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions wherein Invention I produces a three-layer adhered laminate with a cured layer sandwiched between a metal layer and a substrate while Invention III produces a cured coated substrate have a cured three-dimensional metal coating layer exposed on a substrate.

7. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions wherein Invention II produces a packaged metal transfer sheet with an uncured adhesive layer while Invention III produces a cured coated substrate have a cured three-dimensional metal coating layer exposed on a substrate.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1773

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
